BUSINESS PROPOSAL

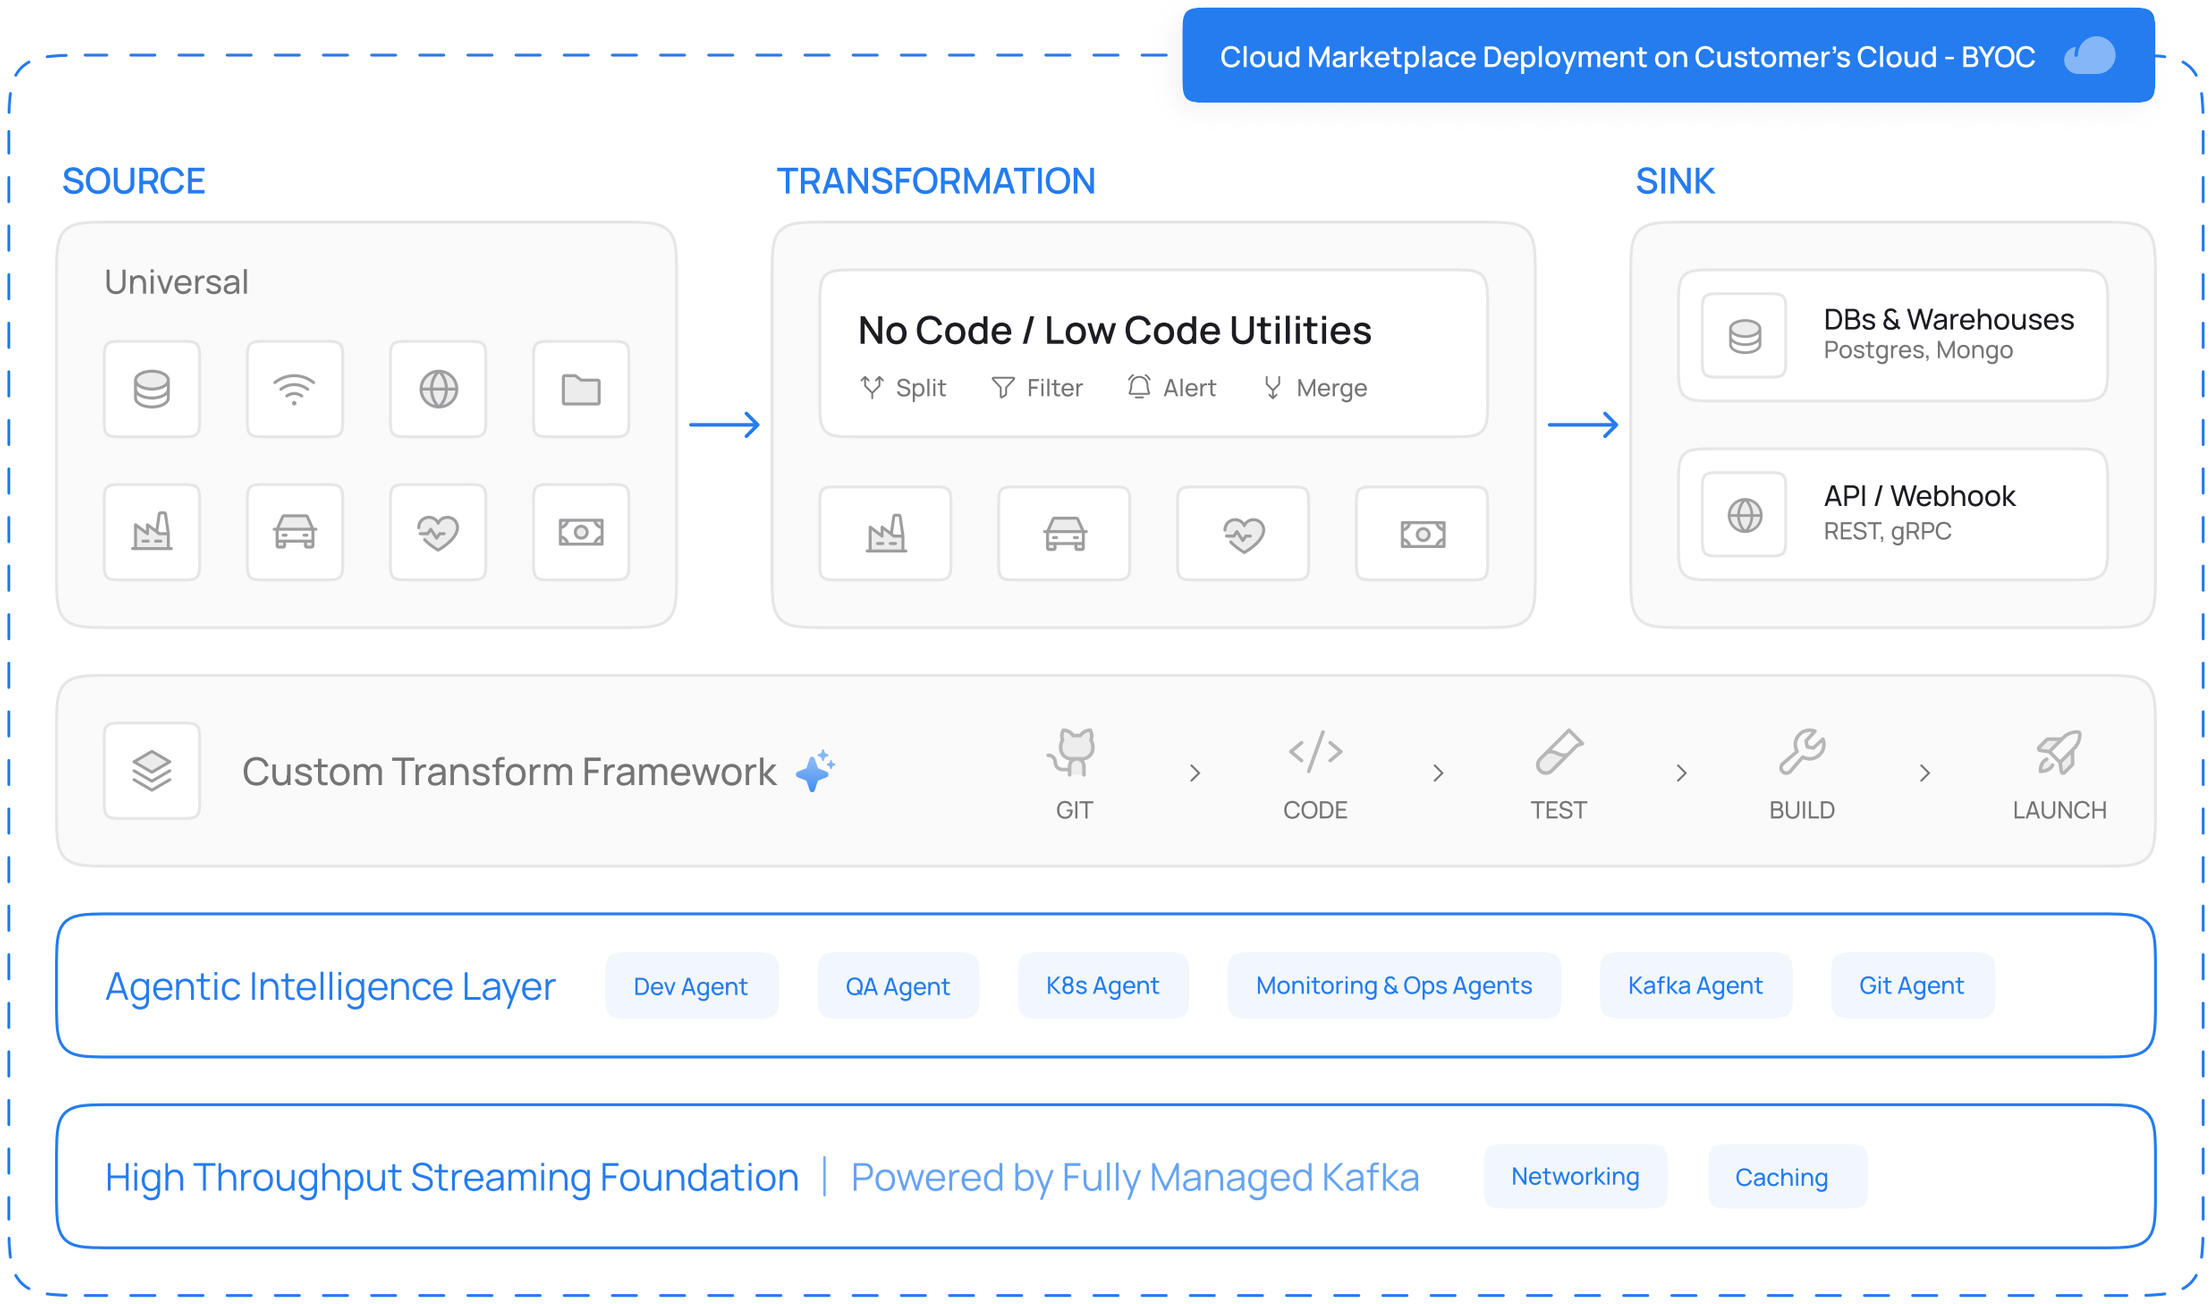
Real Time Data Intelligence for 3iInfotech

Suniel Shekhar Shetty Junior

Head - Database Administration

What is Condense?

Condense is an AI-first streaming platform that unifies how real-time data pipelines are built and managed.
Running as a BYOC (Bring Your Own Cloud) deployment, Condense continuously manages and scales deployments while optimizing costs, creating a closed intelligent loop where pipelines are built faster, run autonomously, and continuously adapt to live data.



Managed Infrastructure | Scalability | Observability | Security Compliant

Why is Condense the Best Fit for Your Company

Success Stories

VOLVO x EICHER — OEM

MyEicher & Uptime Center

- Replaced legacy IBM Event Streams for superior throughput
- Direct hardware integration bypassing expensive gateways
- Mission-critical backend for fleet monitoring

Legacy Replacement | Cost Optimization

ROYAL ENFIELD — OEM

Connected Bike Platform

- Handling high-volume telemetry ingestion
- Optimized for Google Cloud (GCP) deployment
- Core streaming engine for next-gen connected bikes

BYOC Kafka | GCP

MONTRA ELECTRIC — EV OEM

Electric Mobility Platform

- Handling 65 MBps average data ingress load
- Replaced Confluent + Sibros for unified platform
- Data backbone for diverse EV variants (Trucks, 3Ws)

40% reduction in TCO | Scale from 20k to 62K+

TATA MOTORS — OEM

Aftermarket Connectivity & Control

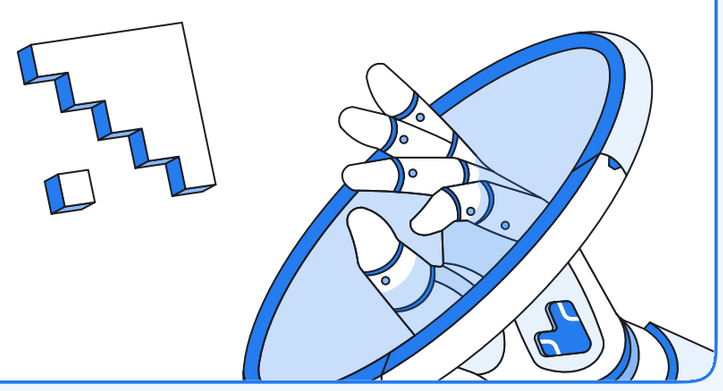
- Full-stack Telemetry, CAN, Events, and DTC integration
- Advanced system integration for legacy and new fleet variants
- Implemented end-to-end real-time streaming for aftermarket devices

15,000 Vehicles | 10s Packet Frequency | Mission-Critical Control

Experience Condense Hands-On & Run a Real POC with Upto 10 MBps

TRY FOR FREE

- 30 DAYS FREE TRIAL
- NO CREDIT CARD REQD

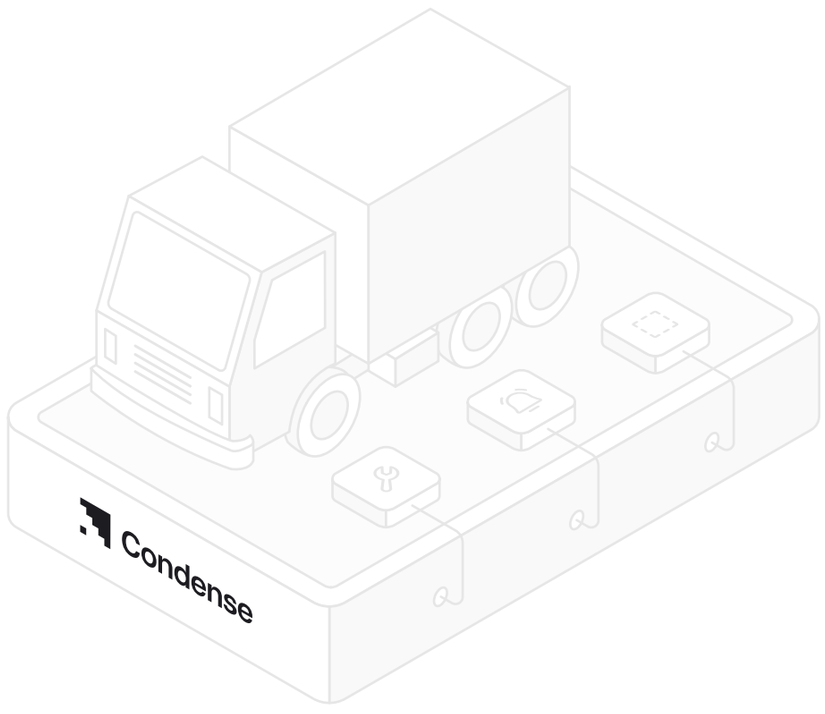


Condense Powering 1 GBps Peak Load with 350 MBps Continuous Throughput

One of India's leading commercial vehicle OEMs migrated from **IBM Event Streams to Condense** to handle 1GBps peak throughput with 350MBps continuous Throughput, unifying **6 data sources with 2-way synchronization.** All of this runs seamlessly with **99.95% uptime.**

Value Delivered :

- 20% reduction in cloud spend
- 35% reduction in development & operations effort
- 100% data localization within their cloud boundary
- 6× faster GTM for new data products & features
- Complete migration support



How Condense Unlocks Value for Customers

Accelerating Go-to-Market Velocity

A Tyre OEM launched a TMS in four months, while 2W/3W brands ship features 10× faster by using prebuilt modules to cut dev cycles

Focus on Innovation with Data Control

By offloading Kafka via BYOC, mining solution engineers focus on innovation while keeping 100% data ownership in their own cloud.

Unlocking Operational ROI

Mining teams added +2 trips per shift by focused innovation while cutting cloud costs by 20%, turning tech into bottom-line gains

Unifying Fragmented Ecosystems

Condense merges scattered streams from fleet info to logistics into one reliable view, turning silos into a single source of truth.

Condense brings together managed Kafka, transformations, connectors, orchestration & observability into one unified platform that runs inside your cloud. It removes the complexity of stitching multiple tools, gives teams a single place to build & operate real-time pipelines & provides the control, security & performance needed for production streaming workloads across industries.
